CLASSIFICATION SECRET/

	SBCREE,	25X1
	2	
ĭ,	Commenta Two fighter regiments equipped with about 55 MiG-15s are believed to be stationed at Crossenhain airfield. A number of MiG-15s most likely are always parked in the various hangars there.	25X1
2.	Commenter The removal of the Token-type radar set was reported	25X1
	The present information supports the previously voiced assumption that the location of the radar set was changed. The radar set was probably woved on Spittelberg (hill). The radio installation of four masts is probably a PKV-45 D/F station. An installation of the same type was previously observed on Stockenwiese (meadow) east of Folbern, in the eastern extension of the runwey. It was not yet determined whether the PKV-D/F stationed mentioned in the present report is the previously observed station or whether another PKV-A5 D/F station was established.	25X1
3.	Comment. The soder was previously observed in Werder. All the trucks were previously reported from Grossenhain.	25X1
